STEEL DOORS FAQs

Common questions about our high-quality steel doors answered.

Q: What makes steel doors better than wooden doors?

A: Steel doors are superior due to their durability, security, and resistance to termites, fire, and harsh weather. They do not warp, crack, or rot like wood, making them a longer-lasting investment.

Q: Are your steel doors energy efficient?

A: Yes, our steel doors are insulated, which helps in reducing energy costs by maintaining better thermal regulation inside your home.

Q: Can steel doors be customized to fit my home's design?

A: Absolutely! Our steel doors come in a variety of colors, finishes, and designs to complement your home's aesthetics. You can even choose custom hardware and glass options.

Q: How secure are Eslabon Hierro steel doors?

A: Our steel doors are equipped with advanced multi-point locking systems, ball bearing hinges for enhanced strength, and are four times stronger than typical wood doors, ensuring top-notch security for your home.

Q: What kind of maintenance do steel doors require?

A: Steel doors require minimal maintenance. Simply clean them with a mild soap and water solution occasionally, and they are resistant to fading, peeling, and rust due to our high-quality powder-coated finish.
